

# Business Test Cases

## Business: FreshMart Online Grocery Store

### Positive Test Case:

Title: Successful Order Placement and Delivery

Test Steps:

1. User logs into FreshMart website.
2. User adds groceries worth LKR 3500 to cart.
3. User proceeds to checkout and selects delivery address.
4. User pays using credit card and confirms order.
5. System processes the payment and generates invoice.
6. Order is dispatched and delivered to the user within 24 hours.

Expected Result: Order is successfully placed, payment is processed, and groceries are delivered on time.

### Negative Test Case:

Title: Failed Payment During Checkout

Test Steps:

1. User logs into FreshMart website.
2. User adds groceries worth LKR 2000 to cart.
3. User proceeds to checkout and selects delivery address.
4. User attempts to pay with expired debit card.
5. System tries to process payment and throws error.

Expected Result: Order is not placed, user is shown a payment failure message, and prompted to try another payment method.
